Lê Thanh Việt

Frontend Developer

SKILLS

ReactJS, Typescript ~ 4 years

VueJS ~ 1.5 years

NextJS ~ 2 years

GraphQL - 2 years

Git Workflow - 3 years

Leader - 3 years

Nodejs - 2 years

Docker- 2 years

Cloud AWS - 2 years

CERTIFICATES

TOEIC 2-SKILLED 9-2023

795/990

ABOUT ME

"Experienced Frontend Developer with a strong background in security, in research and development teams. Skilled in creating secure, scalable, and high-performance web applications, I bring a blend of technical expertise and leadership to drive innovative projects from concept to completion. Known for my strategic thinking, attention to detail, and commitment to developing secure, user-centric solutions, I am dedicated to advancing technology and pushing the boundaries of what's possible in frontend development. Personally, I believed that my experience may not fully reflect the depth of my knowledge and skills, so don't hesitate to reach out to me to learn more about what I can contribute"

WORK EXPERIENCES

FRONTEND DEVELOPER

FPT Software

01/2025 - Now

- **Led a team of 4 members** to deliver high-quality software solutions, ensuring on-time delivery and adherence to coding standards.
- **Reviewed and optimized code** to improve performance, maintainability, and scalability across multiple project modules.
- **Monitoring the creation and execution of testing**, increasing defect detection rate and improving overall product quality.
- **Developed technical solutions** for complex tasks, reducing development time and resolving critical project bottlenecks.
- **Redesigned and improved project processes**, introducing a new workflow that enhanced efficiency, reduced rework, and strengthened collaboration between development and QA teams.
- **Acted as the technical focal point** for the team, mentoring junior developers and promoting best practices in software design and testing.
- **Contributed to continuous improvement**, aligning project execution with client requirements and company standards.

LANGUAGES

ENGLISH, VIETNAMESE

"I am familiar with frontend development terminology in both English and Vietnamese."

INTERESTS

- Find out new technology
- Reading book, novel
- Gaming

FRONTEND DEVELOPER

THD Cyber Security

10/2021 - 10/2024

Accomplishment

- UBank CloudTrail integrated Application for detecting System Error and Network Attack
- Build SGB Dashboard in Splunk Application for Fraud Detection using ReactJS
- PigData Observability Platform for monitoring system behavior, discover and alert early problem, using ReactJS and Nodejs for server side rendering.
- Designed and implemented frontend architectures, ensuring maintainability, scalability, and performance.
- Mentored team members, conducted code reviews, and promoted best practices in React, TypeScript, and UI/UX design.
- Led a frontend team of 6 developers to build scalable and user-centric applications, including ERP systems, E-learning platforms, and document management solutions.
- Building an exceptional team that can cooporate together effectively, Implemented clear roles and responsibilities to ensure seamless collaboration and efficiency.

EDUCATION

INFORMATION TECHNOLOGY

Academy of Cryptography Techniques

09/2018 - 09/2023

GPA 3.4/4.0. Rank top 4 in Ho Chi Minh Campus

WORKED PROJECTS

ERP SYSTEM DEVELOPMENT

1/8/2023 - 10/10/2024

Description: Designed and developed a comprehensive ERP system to streamline organizational processes, including HR management, finance tracking, and inventory management. The project included both a web application and a mobile application to provide flexibility and accessibility for users.
Team size: 6
Role: Tech Lead
Responsibilities:

- Led the development of both web and mobile applications, ensuring alignment with project goals and timelines.
- Designed the architecture for scalable and efficient system integration.
- Reviewed and optimized codebases for performance, scalability, and maintainability.
- Collaborated with cross-functional teams to define and implement core ERP functionalities.
- Led the mobile application development using **React Native**, ensuring 99% code sharing between iOS and Android while optimizing FlatList performance for large inventory datasets.
- Architected the global state management using **Redux Saga** to handle complex asynchronous business logic, specifically for **offline-first capabilities** (queuing actions when offline and syncing via Saga generators when online).
- Mentored team members and facilitated knowledge-sharing sessions to improve technical skills and project delivery.
  Technologies used: React.js, React Native, Redux, Node.js, Tailwind CSS, Firebase, PostgreSQL

PIGDATA OBSERVABILITY PLATFORM

05/10/2022 - 10/10/2023

Project: PigData Observability Platform (10/2022 - 02/2023)
Description: Developed an observability platform for visualizing system performance, tracing metrics, and managing logs, offering a real-time analytical dashboard for enhanced decision-making.
Team size: 5
Role: Front-end Developer
Responsibilities:

- Designed and implemented interactive data visualizations using Echarts and Flamegraph to present system metrics and trace analysis.
- Built intuitive workflows with React Flow for seamless visualization of system dependencies and data pipelines.
- Integrated and optimized complex data visualizations for performance and usability.
- Collaborated with the backend team to handle API integrations and ensure efficient data handling.
- Implemented **Redux Saga** to manage heavy concurrent data streams (WebSockets & Long-polling), ensuring non-blocking UI updates for the real-time monitoring dashboard.
- Conducted rigorous testing to ensure the accuracy and responsiveness of visualizations and interactions.
  Technologies used: React.js, TypeScript, Echarts, React Flow, Flamegraph, Redux, Tailwind CSS

UBANK CLOUDTRAIL INTEGRATED APPLICATION

4/4/2022 - 5/10/2022

Description: Developed an integrated application leveraging AWS CloudTrail for detecting system errors and network attacks, enhancing system reliability and security.
Team size: 6
Role: Tech Lead
Responsibilities:

- Designed the application architecture to analyze AWS CloudTrail logs for anomalies.
- Implemented real-time error and attack detection algorithms using advanced analytics tools.
- Led the integration of CloudTrail logs with visualization and alerting systems.
- Ensured secure and efficient data processing pipelines.
  Technologies used: React.js, Node.js, AWS CloudTrail, AWS Lambda, Splunk, Tailwind CSS

SGB FRAUD DETECTION PLATFORM

4/10/2021 - 1/4/2022

Description: Developed a dashboard for managing Splunk data and providing detailed analytics for Saigon Bank. The platform focused on user-friendly data visualization and operational insights.
Team size: 4
Role: Front-end Developer
Responsibilities:

- Designed and implemented interactive UI components using React.js.
- Collaborated with the backend team to integrate RESTful APIs for real-time data updates.
- Optimized performance by implementing state management techniques and improving rendering efficiency.
- Utilized **Redux Saga** to orchestrate sequential API calls for fraud verification workflows, ensuring transactional data integrity and proper error handling.
- Conducted testing and debugging to ensure a seamless user experience.
  Technologies used: React.js, Redux, REST API, CSS Modules, Splunk API, Webpack
